Green Party

Of
Northeast
INDIANA

*America Needs
The Green Party*

Many American don't believe politics is for them. Two-thirds of us didn't even bother to vote in the last election.

At the same time, lots of people are getting into activism and finding bold new ways to challenge the system. They want something that can't be controlled by big money of powerful elite. More people feel they need a third party to represent them, The Green Party is that party. We have to go beyond the red and the blue and Go Green.

We are ready for REAL CHANGE

We have a grassroots , bottom-up approach based on our values and our visions of a better world.

We run candidates who aren't beholden to big business. Many come from the progressive movements, peace movement, and civil rights movement. And we win elections. With electoral reforms like Runoff Voting (IRV) and public campaign financing we will win a lot more.

If not the GREEN PARTY, then who?

If the Green Party doesn't challenge the two party system and the 1%, who will. Who's going to fight for the common sense solutions that will move us towards a sustainable future? The Green Party is going to replace corrupt and ineffectual politicians with people who represent YOU!

VOTES
People, Planet
Peace
GREEN

NOW is the TIME!

America was once the "land of opportunity." But since the 1970's , all the tread lines have pointed down. Many of us - too many - can only see a bleak future because of corporate and elite control of our government through policies such as Citizen's United.

Climate change is already here: record-breaking floods, droughts, storms, and toxic spills. More is in store - if we don't act now and halt the profit over planet policies currently steering us towards extinction.

Endless wars of aggression against humanity just to strip away resources from other countries are sold to Americans as patriotic and protecting freedom when they are just profits for a gluttonous war industry. War costs the United States \$8,362,785 every hour since 2001 .The tax dollars pumped into the America war machine could easily fund a protective armed forces while funding rebuilding & maintenance of our infrastructure, free higher education and healthcare for all.

Our Government must be part of the solutions, but when it's controlled by the 1% and elites, it's part of the problem. The longer we wait for change, the harder it gets. It's time for common sense solutions and a sustainable future, it's time for The Green Party.

PEOPLE - PLANET - PEACE
